1. Sort all edges by nondecreasing weight:

$$w(7,8) < w(3,9) = w(6,7) < w(1,2) = w(3,6) < w(4,6) \\ < w(7,9) < w(3,4) = w(8,9) < w(2,3) = w(8,8) \\ < w(4,5) < w(2,8)$$

2. For each edge, test if adding the edge closes a cycle and if not, add it to the tree
